"In such a short period of time we have seen amazing results. Student interest and enrollment far exceed expectations; students see the relevance in what they are learning, and graduation rates are excelling any pre-set expectations. Graduates are also going into college more prepared than ever because they have already demonstrated strength in college course work, and they are transitioning smoothly from the classroom into the workforce. Their reward is a well-paying job in their field of study and putting their education to use. These are all great indicators that College and Career Academies work. The possibilities are endless and this project has just begun."

- Lieutenant Governor, Casey Cagle
