SECTION A

INTRODUCTION

The measures to ensure the cybersafety of JCSS Middle Schools outlined in this document are based on our core values.

The school's computer network, Internet access facilities, computers and other school technology equipment/devices bring great benefits to the teaching and learning programs at JCSS Middle Schools, and to the effective operation of the school.

The overall goal of the school in this matter is to create and maintain a cybersafety culture which is in keeping with the values of the school, and legislative and professional obligations. This use agreement includes information about your obligations, responsibilities, and the nature of possible consequences associated with cybersafety breaches which undermine the safety of the school environment.

All students will be issued with this document. If a non-use agreement (see Section D) *is not* returned to the school, students will be allowed to use the school technology equipment/devices.

The school's computer network, Internet access facilities, computers and other school technology equipment/devices are for educational purposes appropriate to the school environment. This applies whether the technology equipment is owned or leased either partially or wholly by the school, and used on *or* off the school site.

The school may monitor traffic and material sent and received using the school's technology network. The school may use filtering and/or monitoring software to restrict access to certain sites and data, including email.

The school may audit its computer network, Internet access facilities, computers and other school technology equipment/devices or commission an independent forensic audit.
